About Me

Passionate Full Stack Developer skilled in building modern, responsive, and user-friendly web applications using MERN Stack, Next.js, and TypeScript. Focused on creating scalable digital solutions with clean UI/UX, optimized performance, and efficient development workflows powered by modern tools and AI technologies.

Skills

- Full Stack Web Development
- React.js & Next.js
- TypeScript & JavaScript
- Node.js & Express.js
- MongoDB & REST APIs
- AI Integration
- AI Coding Tools

Education

- **Bachelor of Science - Computer Science**

*Mehran University of Engineering and
Technology, Jamshoro*

2023-2027

Gained practical exposure to core computing concepts including data structures, databases, and web technologies, along with hands-on experience in building academic and personal projects. Focused on applying theoretical knowledge to real-world problem solving and modern software development practices.

Projects

Wise Visualization

A dark, immersive portfolio website for a 3D animation studio built with Next.js and TypeScript. Features dynamic project listings, Cloudinary-powered media galleries, and Sanity CMS integration with real-time content updates via ISR. Includes secure contact form handling with Supabase and interactive UI effects like custom cursor behavior and scroll-based animations.

ExpenseLens

An AI-powered expense tracking SaaS that automatically extracts receipt data using OCR (Google Vision) and GPT-4o-mini. Built with a secure Supabase backend, it provides real-time analytics, spending insights, and visual reports. Users can search, filter, export expenses, and manage AI-generated categories through an intuitive dashboard.

UnitRemind

A SaaS application for landlords to manage rental units, automate maintenance schedules, and track lease deadlines. Features task management with status tracking, automated email reminders via Resend, and subscription-based access using Stripe. Designed as a lightweight, mobile-first solution for small-scale property management.
